As a local provider:

1. Calls receive same-day service.
2. Technologists are readily available for around the clock service.
3. Excellent relationship with Principal Partners, such as Sutter and Kaiser.
4. Quick response to questions.
5. Stats completed within 2-3 hours.
6. Set up portal access to My PACS system to view reports and images.

The Mobile X-Ray Process

- Exam ordered by phone or by fax
- Technologist dispatched
- Digital x-ray performed, stored, and sent for reading on location

**Your local choice for
mobile X-ray and
EKG services**

About Digital X-Ray

Most hospitals now have digital x-ray systems. These units have been available for mobile use for several years.

A special "plate" is used in the x-ray cassettes instead of film. When the x-ray is taken, the "plate" stores information in tiny pixel units and then is released as an image after digital processing. The image is stored on a computer and sent to the radiologist for a reading.

Some advantages of digital x-ray:

- No hazardous chemicals
- Less patient radiation
- Fast digital storage and image retrieval
- Multi-image manipulations for precise interpretation
- High quality images

PACS VIEWER

Doctors and Nurses now have the option of viewing x-ray images and reports through our secure PACS server network.

Authorized users have access to this information 24 hours a day, 7 days a week.

Services Offered

- Digital X-Ray
- 12 LEAD EKGs
- 24 hour service
- EMAIL to D.O.N.

Ways to View an Image

- CD is burned and left at the facility
- PACS system viewing

Benefits

- Board Certified Radiologist
- Gentle and caring service
- Local storage of Images and Reports
- Online image viewing
